TAMMY K. CLARK CONSULTING
SAFETY EDUCATION, TRAINING, & OSHA CERTIFICATION

November 21, 2011

I have had the privilege of working with Horizon Construction Group (HCG) for several months now, and am very impressed at the dedication I have seen to safety compliance.

I was hired by Horizon Construction Group as a Safety Consultant on several of their projects, which include a \$45 million indoor waterpark/resort, along with many other impressive projects ranging from urban renewal housing developments to senior retirement properties. I have worked on nine projects for Horizon across the Midwest, and have been very impressed at the level of safety compliance across the board. All of their Superintendents are safety trained, and are very diligent about safety checks and compliance.

As a construction industry consultant, I have worked with many large multi-national corporations, and enjoy splitting my time between consulting for large construction companies, and teaching for local school districts, universities, and industry professionals. Working with a company like Horizon makes my work both enjoyable and rewarding.

In my professional opinion, Horizon Construction Group is a company of excellence and dedication. They are carving a niche for themselves in several specific aspects of the construction industry, and are doing so with a very high level of safety awareness and dedication, as they take a "Zero-Tolerance Policy" with regards to fall protection, and have given me their full support in enforcing OSHA standards onsite.

Just this past week, we endured a 3 day OSHA inspection on one of their projects, yet we breezed through with zero citations, due to the safety diligence and focus that is a part of the HCG philosophy. This is unheard of on a project of this size and publicity, and is a true testament to the company culture at HCG.

I am proud to be a part of the Horizon team.

Sincerely,

Tammy K. Clark
