

Soaring Eagle Water Park Promises Exciting Fun for all Ages

FRANK CLOUTIER

Public Relations Director

The anticipation is building just in time for holiday dinner table conversation. Our very own Soaring Eagle Water Park & Hotel construction continues at a very steady pace with so many things coming together at the same time. This construction is still slated to open sometime in May of 2012. "We could not be happier with the progress thus far on the pace of construction and the quality of work completed" stated Project Manager Lisa Darnell.

There will be so much to choose from when the Soaring Eagle Water Park & Hotel opens for business. First choice will probably be what slide to try first with two separate selections. The first is the "Bullet Bowl Tubing Slide". The ProSlide Bullet Tubing Slide starts as an

enclosed waterslide flume, which opens to a Bowl where you, the guests, experience a number of revolutions before exiting from the center of the Bowl, back into an enclosed flume and finally into a splash pool. This Bowl Slide will have lighting designed to surprise and excite the swirling experience for each of our guests. The second slide is the ProTube

32 Body Slide. This enclosed water slide system is designed to convey the rider on a twisting course, while descending into a splash pool. Both of which are very fast and fun. Each section of slide will alternate between merlot and green color

to create an ever changing sense of speed and excitement.

The Lazy River will provide that relaxing float down and through the main body of the Water Park with views of the Wave Rider, Dump Bucket Station, Activity

pool and Rock Climbing Wall peaking out from behind rock outcrops and woodland treatments. Every one of these amenities is being designed specifically to provide the optimum in excitement and never ending fun for all ages. Parents or those just looking for some quiet time will be able to access the adult pool, spa and steam area designed specifically to allow you an eagle's eye view of your young ones while relaxing in a tranquil environment.

The property will also be offering other amenities such as the Restaurant/Lounge, Golf Course and Pro Shop, Guest Laundry, Fitness, Meeting Rooms for up to 48, Gift Shop, Arcade and 243 guestrooms with standard, family extended suites and the premier Eagles Nest Suites specially designed to provide

that comfortable nesting feeling for the entire family. All of these amenities will be easily accessible and contained within the same complex. Soaring Eagle Water Park & Hotel will be offering the traditional pass key for guest stays for easy and secure entry and exit into your guest room. "Currently we are researching specialized technology that will make it more navigable to access the full compliment of amenities throughout the entire water park" stated Migizi CEO Jennifer Turner.

The Court Yard feature between

the north and south wings of the Hotel will provide a space for the entire family. Everyone will be able to gather around a very spacious and comfortable Fire Pit to share a few laughs and stories of the day. There will be a water feature that will double for ice skating in the winter, playground equip-

ment, putting greens and patio areas for the ground floor room options. This Water Park and Hotel has something for everyone.

Another very exciting addition to this project is the "Soaring Eagle Hideaway RV Park". The expected opening for this state of the art RV Park is scheduled for Memorial Day 2012. When this project is completed; the park will offer 67 upscale sites with concrete pads, water, sewer, electrical and wireless internet service. Soaring Eagle Hideaway Park will provide a very rich and

comfortable RV setting with offerings such as the community fire pit, beach overlooking 7 acres of water with designated swimming areas, picnic pavilion, playground, horse shoe pits, fishing opportunities, walking trails, quest laundry, bath house with shower facilities, camp store, club house to include game room, multi purpose room, reading room and deck system overlooking the lake. Guests will be allowed access to the Soaring Eagle Water Park & Hotel for use of the amenities.

There are so many exciting things to look forward to in the near future. It is refreshing to see growth and development during such economically challenging times. The Saginaw Chippewa Indian Tribe will be taking their time to carefully plan the Grand Opening of both

the Soaring Eagle Water Park & Hotel and the Soaring Eagle Hideaway RV Park to ensure the spectacle matches the design and fine features of each entity. Please look forward to more updates as time draws nearer to the opening.

Next month, we will be providing an update on the Water and Waste Water construction currently under way in Saganing. You can rest assured we will be growing our efforts there in the very near future as well. Enjoy your holiday season and best of wishes.
